

Guides

You can download data in different data formats via Energi Data Service. Below you will find guides for finding datasets, creating filters and downloading data. If you want to download large amounts of data or combine data across data sets, use API.

Find dataset

1. Click 'Datasets' at the top of the page. You can also use the search box if you already know the name of the data set, you are looking for.

2. Here you find all datasets at Energi Data Service. You can view specific groups of datasets by using the filter options on the left side. It is possible to filter by organization, data group or tags. Click on the desired dataset.

3. Here you find description and information about the selected dataset. At the bottom of the page it is possible to participate in the debate about the dataset or ask questions. Click 'Preview' to view data.

DATA EXPLORER FILTERS

No data filters are assigned to this Data Explorer view yet. You are viewing an unfiltered version of the complete resource data.

A HourUTC **B** **INTERVAL** **C** = **D** 2018-09-10 00:00 **SAVE**

CREATE

2. First select A) which column should be filtered. It is possible to create filters on all columns in the dataset, though you can't sort out columns. Then select B) if the result should be respectively equal to, not equal to, less than, more than, less than or equal to, more than or equal to the value, you enter in C). In this example 'equal to' is selected, marked with a green color. Since this filter is selected in a date column, you can click the calendar icon and choose the desired date. Finally click 'Save' and then the filter become active.

FILTER **DOWNLOAD** **METADATA** **DATA API**

DATA EXPLORER FILTERS

HourUTC = 2018-09-10 00:00

CREATE

3. Create more filters by clicking 'Create' again, or delete the filter by clicking the small cross next to the filter. It is possible to edit the filter by clicking the pencil icon. NOTE! Clicking the grey/white cross in the upper right of the 'Data Explorer Filters' box, closes the box but the filters are still active.

FILTER DOWNLOAD METADATA DATA API

- JSON
 - CSV...
 - XLSX - Excel
 - XML
- Downloads are limited to the top 100000 rows

Hour UTC	Hour DK	Price Area	Spot Price EUR
2018-09-30 21:00Z	2018-09-30 23:00	SYS	42.05
2018-09-30 21:00Z	2018-09-30 23:00	SE4	306.77

1. Click 'Download' to view the options for downloading data. NOTE! Downloads are limited to 100.000 rows. The actual number of rows is displayed just under the dataset title. Attempts to download more than 100.000 rows will result in download of the top 100.000 rows only. Select desired file format from the list. It may take a moment to generate data.
